Add() 2

Support: Executes are returned to hand.
Constructor: Gain +INT after taking damage or when a program is destroyed this cycle.

Add() 2

Support: Executes are returned to hand.
Constructor: Gain +INT after taking damage or when a program is destroyed this cycle.

Add() 2

Support: Executes are returned to hand.
Constructor: Gain +INT after taking damage or when a program is destroyed this cycle.

Grow() 3

Execute: Draw a card.
Support: Has +1 CHA.
Constructor: Add a copy of Grow() to your hand.

Grow() 3

Execute: Draw a card.
Support: Has +1 CHA.
Constructor: Add a copy of Grow() to your hand.

Grow() 3

Execute: Draw a card.
Support: Has +1 CHA.
Constructor: Add a copy of Grow() to your hand.

Bloom() 2

Execute: All players Lose -2 REP.
Support: Move Bloom() to Constructor Slot on Deactivation.
Constructor: Lose -1 REP and have +3 CHA this cycle. Move Bloom() to Support Slot.

Bloom() 2

Execute: All players Lose -2 REP.
Support: Move Bloom() to Constructor Slot on Deactivation.
Constructor: Lose -1 REP and have +3 CHA this cycle. Move Bloom() to Support Slot.

Bloom() 2

Execute: All players Lose -2 REP.
Support: Move Bloom() to Constructor Slot on Deactivation.
Constructor: Lose -1 REP and have +3 CHA this cycle. Move Bloom() to Support Slot.

Shell() 4

Execute: Grant a Program +3 INT.
Support: Have +1 RES.
Call: Gain +1 INT.
Constructor: IMMUNE this cycle. Move Shell() to Support Slot.

Shell() 4

Execute: Grant a Program +3 INT.
Support: Have +1 RES.
Call: Gain +1 INT.
Constructor: IMMUNE this cycle. Move Shell() to Support Slot.

Shell() 4

Execute: Grant a Program +3 INT.
Support: Have +1 RES.
Call: Gain +1 INT.
Constructor: IMMUNE this cycle. Move Shell() to Support Slot.

Help() 1

Execute: Draw a card and show it to all players.
Constructor: Gain +1 REP.

Help() 1

Execute: Draw a card and show it to all players.
Constructor: Gain +1 REP.

Help() 1

Execute: Draw a card and show it to all players.
Constructor: Gain +1 REP.

Shade() 2

Execute: Deactivate a Program.
Call: Deactivate Target's Top Active Program.
Constructor: When damaged, move this Program to the lowest position and deactivate it.

Shade() 2

Execute: Deactivate a Program.
Call: Deactivate Target's Top Active Program.
Constructor: When damaged, move this Program to the lowest position and deactivate it.

Shade() 2

Execute: Deactivate a Program.
Call: Deactivate Target's Top Active Program.
Constructor: When damaged, move this Program to the lowest position and deactivate it.

Split() 3

Execute: Transfer all INT from one of your Programs to another.
Call: Lose -1 INT, Grant all other ally Programs +1 INT.

Split() 3

Execute: Transfer all INT from one of your Programs to another.
Call: Lose -1 INT, Grant all other ally Programs +1 INT.

Split() 3

Execute: Transfer all INT from one of your Programs to another.
Call: Lose -1 INT, Grant all other ally Programs +1 INT.

Blink() 2

Execute: Gain 3 CPU this turn.
Call: Deal 2 Damage to Target's Bottom Program.
Constructor: Gain +1 CPU, but Lose -1 REP.

Blink() 2

Execute: Gain 3 CPU this turn.
Call: Deal 2 Damage to Target's Bottom Program.
Constructor: Gain +1 CPU, but Lose -1 REP.

Blink() 2

Execute: Gain 3 CPU this turn.
Call: Deal 2 Damage to Target's Bottom Program.
Constructor: Gain +1 CPU, but Lose -1 REP.

Load() 2

Execute: +3 REP.
Support: Friendly Nulls return to hand instead of being destroyed, and do not lower REP.
Constructor: Gain +1 INT.

Load() 2

Execute: +3 REP.
Support: Friendly Nulls return to hand instead of being destroyed, and do not lower REP.
Constructor: Gain +1 INT.

Load() 2

Execute: +3 REP.
Support: Friendly Nulls return to hand instead of being destroyed, and do not lower REP.
Constructor: Gain +1 INT.

Get() 2

Call: Switch this Function with Target's Highest Program's lowest Support Function.
Constructor: Move this program to highest position. Move Get() to Call Slot.

Get() 2

Call: Switch this Function with Target's Highest Program's lowest Support Function.
Constructor: Move this program to highest position. Move Get() to Call Slot.

Get() 2

Call: Switch this Function with Target's Highest Program's lowest Support Function.
Constructor: Move this program to highest position. Move Get() to Call Slot.

Purge() 4

Execute: Destroy a damage dealing Program.
Support: Has +1 RES.
Call: Destroy the Target's highest Program that deals damage.
Constructor: Gain +2 REP but has -1 RES.

Purge() 4

Execute: Destroy a damage dealing Program.
Support: Has +1 RES.
Call: Destroy the Target's highest Program that deals damage.
Constructor: Gain +2 REP but has -1 RES.

Purge() 4

Execute: Destroy a damage dealing Program.
Support: Has +1 RES.
Call: Destroy the Target's highest Program that deals damage.
Constructor: Gain +2 REP but has -1 RES.

Void() 4

Execute: Destroy a Player's lowest Program.
Call: Destroy this Program's highest Call Function and the Target's lowest Program.

Void() 4

Execute: Destroy a Player's lowest Program.
Call: Destroy this Program's highest Call Function and the Target's lowest Program.

Void() 4

Execute: Destroy a Player's lowest Program.
Call: Destroy this Program's highest Call Function and the Target's lowest Program.

Eject() 2

Execute: Destroy a damage dealing Function.
Call: Destroy the Target's Top Program's Damage Dealing Functions.

Eject() 2

Execute: Destroy a damage dealing Function.
Call: Destroy the Target's Top Program's Damage Dealing Functions.

Eject() 2

Execute: Destroy a damage dealing Function.
Call: Destroy the Target's Top Program's Damage Dealing Functions.

Seed() 2

Support: Nulls revealed on this Program lower all opponents REP instead of your own.
Constructor: The next Null revealed this cycle is destroyed, and the Target loses -2 REP.

Seed() 2

Support: Nulls revealed on this Program lower all opponents REP instead of your own.
Constructor: The next Null revealed this cycle is destroyed, and the Target loses -2 REP.

Seed() 2

Support: Nulls revealed on this Program lower all opponents REP instead of your own.
Constructor: The next Null revealed this cycle is destroyed, and the Target loses -2 REP.

Tap() 3

Execute: Deal 1 Damage to all non-friendly Programs.
Support: When damage, deal 1 Damage to the source Program.
Call: Deal 1 Damage to all Target's Programs.

Tap() 3

Execute: Deal 1 Damage to all non-friendly Programs.
Support: When damage, deal 1 Damage to the source Program.
Call: Deal 1 Damage to all Target's Programs.

Tap() 3

Execute: Deal 1 Damage to all non-friendly Programs.
Support: When damage, deal 1 Damage to the source Program.
Call: Deal 1 Damage to all Target's Programs.

Crash() 3

Execute: Destroy a Function.
Call: Destroy the Target's Top Program's highest Constructor Function.

Crash() 3

Execute: Destroy a Function.
Call: Destroy the Target's Top Program's highest Constructor Function.

Crash() 3

Execute: Destroy a Function.
Call: Destroy the Target's Top Program's highest Constructor Function.

Patch() 3

Execute: Activate a Program and all its Functions, finish the lowest Null Function. If a Function is finished, Gain +3 REP.
Constructor: The next Null revealed this cycle is finished, and you Gain +2 REP.

Patch() 3

Execute: Activate a Program and all its Functions, finish the lowest Null Function. If a Function is finished, Gain +3 REP.
Constructor: The next Null revealed this cycle is finished, and you Gain +2 REP.

Patch() 3

Execute: Activate a Program and all its Functions, finish the lowest Null Function. If a Function is finished, Gain +3 REP.
Constructor: The next Null revealed this cycle is finished, and you Gain +2 REP.

Recycle() 3

Call: Activate the highest Deactivated Function on an Active Program, and destroy it if it is Null. If a Function is destroyed, Gain +3 INT and +1 CHA.
Constructor: The next Null revealed this cycle is destroyed, and this Program Gains +2 INT and +1 CHA.

Recycle() 3

Call: Activate the highest Deactivated Function on an Active Program, and destroy it if it is Null. If a Function is destroyed, Gain +3 INT and +1 CHA.
Constructor: The next Null revealed this cycle is destroyed, and this Program Gains +2 INT and +1 CHA.

Recycle() 3

Call: Activate the highest Deactivated Function on an Active Program, and destroy it if it is Null. If a Function is destroyed, Gain +3 INT and +1 CHA.
Constructor: The next Null revealed this cycle is destroyed, and this Program Gains +2 INT and +1 CHA.
